FOR IMMEDIATE RELEASE

Altova Launches Version 7.2 of MobileTogether

Beverly, Mass., December 15, 2020 – Altova® (http://www.altova.com) announced the release of MobileTogether 7.2, its rapid mobile app development platform. This latest release introduces several new features for refining your app UI and providing flexible options for end users, as well as enhanced logging tools, and much more.

MobileTogether is a feature rich, rapid app development platform. The latest additions of new UI controls and logging options added in Version 7.2 continue to enhance the data driven apps developers are building with it.

A highlight of some new features in this release:

- Many new UI and controls features
    - The ability for users to switch themes (light/dark) in MobileTogether client gives users more flexibility in selecting between light and dark modes on the MobileTogether client app.
    - MobileTogether Designer already includes over 30-pre-defined button looks that make it quick and easy for developers to add attractive icons for common tasks to their apps. This release adds a new View button-look to this list.
    - For increased flexibility in styling and refining an app UI, developers can now pick the color for any of the pre-defined button images that come with MobileTogether Designer.
    - Additional styles for slider controls
    - And many more
- New logging options
    - New Action to add log entry allows users to log a message on the MobileTogether Server or client to analyze app behavior after a specific action.
    - Syslog support
- . Other new features
    - New function: mt-server-variable makes it possible to configure different functionality when the same app is running on different servers, such as a test vs. a production server.
    - New function: mt-page-stack will return a list of open pages.
    - Backup/restore support for SQLite

These and many additional features are available in MobileTogether 7.2. To view a complete list of the new features in this release please visit our what's new page.

About Altova

Altova® is a software company offering specialized tools for both developers and business users. The creator of XMLSpy®, MapForce® and other award-winning products, Altova is a key player in the software tools industry and the leader in XML and JSON solution development tools. The company offers a complete line of desktop developer software for XML, JSON, SQL, and UML; high-performance workflow automation server products; and a cross-platform mobile and enterprise app development platform. In addition, the Altova Cloud offers complete SaaS apps that make working with complex technologies easy for business users. With over 5.4 million users worldwide, including 91% of Fortune 500 organizations, Altova is honored to serve clients from one-person shops to the world's largest organizations.
